The workshop will take place in the facility **La Finestra**

Contribution of Euro **50€** per participant

The theatrical workshop aims to those who have already had a theatrical experience and want to increase some themes. It will take place from **5th to 12th September 2015**.

The work will be organized in three moments: the text analysis, a physical work on the actor technique and the construction of a scenic theatre.

Fragments of theatrical texts and literature splinters of authors of different periods will be the means which we begin a journey into the authorship with, a path that could reveal the structures which lead the narration and at the same time make us closer to the knowledge of a theatrical figure as vital as the playwright.

The work over the subtext will reveal themes that we will try to actively examine and the means we use to explore them will be sensorial, listening, contact exercises and especially improvisations based on movement and sound.

Through improvisation we will try a more direct and deeper communication made of images and emotions, in order to favour the creativity of the individual within the group.

The last step of our work will be the active participation in the creation of a scenic work that will found its previous phases in a unique body.
